Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 43-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al. '358 (to Donald Brown).

Brown et al. shows a box 10 having an interior space 242, 244; score lines 110 forming an aperture; recess 240, 241, 243, 245 that runs the entire width of the box; bag 246, 248; open end seen in Figure 13; and plate 112 that extends over the recess. Brown et al. lacks the soap and the battery. As soap (in the form of shampoo) is a hair care product, it would have been obvious to one of ordinary skill in the art to provide soap in the bag provided by Brown et al. in order to be able to clean the hair before

treatment. Further, as the recess is a storage area, placing batteries in the storage area would have been obvious as numerous hair treatment devices operate on batteries.

Response to Arguments

4. Applicant's arguments filed 9/12/2005 have been fully considered but they are not persuasive. \

Applicant contends that Brown et al. does not contemplate the storage of batteries. First, the device merely needs to be "configured" to support a battery. As long as the device is capable of storing a battery, the claimed limitation is met. Further, as it is a storage area and many devices run on batteries, one would look to common supplies to put in the space (like batteries).

Applicant further contends that the battery would not be accessible while within the storage compartment. As seen in Figure 3, there is no reason that a battery would not be accessible.

Finally, applicant contends that the Brown et al. device could not securely support a battery. This is not true as there are batteries of various sizes that could fit in the device of Brown et al. and the dimensions of Brown et al. would also be dependent on the desired amount of liquid to be dispensed and the storage size requirement. Further, batteries could clearly be placed end to end and, thus, fit securely.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
